

INSTRUMENTATION DIVISION

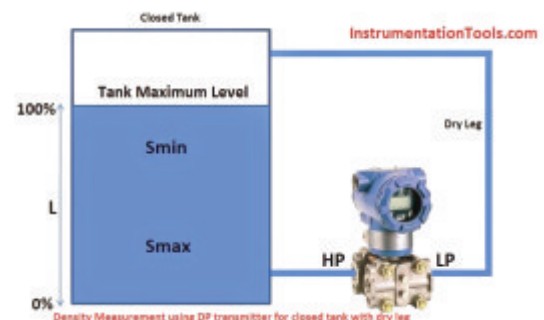

Flow Metering

Types: Orifice based DP transmitter, Turbine, Vortex, Electro-Magnetic, Thermal mass, Coriolis Mass, Positive Displacement, Rota Meter, Variable Area, Flow Meters, for Steam, Water (Hot/Cold), Compressed Air, Natural Gas, Oil, Chemicals & Acids etc.

Level Measurement

Types: DP, Ultrasonic, Radar, Hydro Static Probe capacitance, Magnitrol Transmitter etc.

Temperature and pressure Measurement

All Pressure & temperature Instruments

Analyzers

All type of Analyzer, PH, ORP, Conductivity, DO Meters, O2, Co2 etc.

PID Controllers, Process Indicators & Paperless Recorders

All type of Process Indicators, Panel Meters,
PID Controllers & Paperless Recorders

Control Valves, SOV & Positioner

All type of control valves, SOV's, Elctro-pneumatic positioner, actuator etc

Variable Frequency Drives & Soft Starters

We have full expertise on different famous brand of VFD's. Our team has full grip of Installation and commissioning. Brands we are working on are Danfoss, INVT, Delta, Mitsubishi, Invent, Shinlin etc.

Rating: 0.75kw – 700kw

WEIGHING DIVISION

This collage displays a variety of industrial weighing and measurement solutions. It includes:

- Load Cells:** Two types are shown at the top left: a cylindrical 'OCTAGON' load cell and a smaller, more compact cylindrical load cell.
- Digital Scales:** Several digital scales are featured, including a small desktop scale with a black display, a larger white desktop scale showing '3.190', and a small blue digital scale.
- Platform Scale:** A large, flat, grey platform scale with a digital display on a stand, branded 'METTLER TOLEDO'.
- Conveyor System:** A complex industrial setup on the right featuring a conveyor belt, a hopper, and various mechanical components for automated weighing and processing.
- Miniature Model:** A small-scale model of a truck on a red conveyor belt, used for testing or demonstration purposes.
